COMPLETE HYDRAULIC PUMP

In 2002, it started operations by importing original spare parts for construction machines from Korean brands such as Samsung, Volvo, Daewoo, Hyundai, and Halla.

Over time, due to changing market conditions and domestic demand, our company also began importing key original and aftermarket spare parts for Japanese group machines such as Komatsu, Hitachi, Kobelco, Sumitomo, and Kato.

This group mainly includes hydraulic system components such as pump hydro motors, sealing components, and undercarriage parts for Japanese-origin tracked excavators.

Our company, considering the long-standing shortage of original spare parts in the Japanese group caused by high pricing policies, has, through long-term negotiations and agreements with original spare part manufacturers of Japanese and Korean construction machines, offered these parts to customers at nearly domestic production prices.

This not only protected customer interests but also reduced foreign currency outflow within the limits of its own capabilities.

It has also been operating for the past 3 years in the supply of original breaker assemblies and spare parts.

Some materials in this group are available in stock, while others are imported based on order and demand.

With a wide product range (all spare parts used in excavators, totaling 9,936 items) and always-ready stock, it will continue to serve the construction and machinery market with determined steps.
